Description: Transmitter, 4...20mA current output and plug-in connector for use with WEKA Visual Level Indicators media temperature ≤ 150°C

The transmitter is mounted outside of the float chamber opposite to the indication rail (see datasheet 20010501). The magnet inside the float activates the reed switches in the transmitter, depending on the level of liquid in the float chamber, thereby changing the effective value of a resistance network. The resulting voltage output is converted by an internal electronic circuit to a 4...20mA signal. If the liquid level rises above the measuring range of the transmitter (30 mm) the output signal jumps to 115% (ca. 22,5mA) and remains on that limit.

When ordering level indicators with transmitters, hose clamps are included.

When ordering transmitters as spare parts, hose clamps are never included and must be ordered seperately.

In case of ordering hose clamps pipe size must be indicated:

Type xxxxx-10 T1=65mm T2=30mm / Type xxxxx-05 T1=30mm T2=65mm

For pipe diameter 30...40mm Part no. 80648 For pipe diameter 40...57mm and 57...80mm Part no. 84043

Note

Please read the instructions in our datasheet 20010501 before performing installation. Connector plug included.
